HIGHEST PERMITTED CLAIM

Feature-specific predictive reliance

Overall adequacy and feature-family reliance pass. The requested event-recovery claim is not permitted because top-k recovery does not pass.

PRIMARY REASON: F_TOP_K_FAIL · 14 Jul 2026, 17:41

2 / 3

Rows passed audit

Paired RMSE difference: 95% block-bootstrap interval

Explore evidence

A

Overall predictive adequacy

Selected is baseline

RESULT: -0.42 · [−0.63, −0.11]

Report ID: 1

B

Feature-family reliance

Full is required

RESULT: -0.18 · [−0.31, −0.04]

Report ID: 4

E

Event recovery

Top-k recovery

RESULT: 2 of 3 · Top-k failed

Report ID: 1

D

Robustness diagnostics

Optional diagnostics

RESULT: — · No verdict effect

Report ID: 2047

CLAIM LADDER

Why the verdict steps here

Event-recovery claim

A + B + E required

Feature-specific predictive reliance

A + B required

Overall predictive claim only

A required

Model-descriptive explanation only

Always available

Warnings & limitations

Carry these into interpretation

Low block count

24 blocks may produce wider uncertainty intervals.

Predictive, not causal

This audit does not verify causality, confounding, or distribution validity.

Module D is diagnostic

Explanation evidence never promotes the permitted claim.

PREDICTIVE ELIGIBILITY, NOT CAUSALITY
